

## MT2013-09C : Umbilical Cord Blood Transplantation Using a Myeloablative Preparative Regimen for the Treatment of Hematological Diseases

**Status:** Recruiting

### Eligibility Criteria

**Age:** Not specified

This study is NOT accepting healthy

**Healthy Volunteers:** volunteers

**Inclusion Criteria:**

- up to 55 years old - see link to [clinicaltrials.gov](http://clinicaltrials.gov) for inclusion criteria specific to each type of leukemia

---

**Exclusion Criteria:**

- Radiation Oncology will evaluate all patients who have had previous radiation therapy - pregnant or breastfeeding - HIV positive - study staff will review additional exclusion criteria

### Conditions & Interventions

**Conditions:**

Cancer

**Keywords:**

Clinics and Surgery Center (CSC), Acute Lymphocytic Leukemia (ALL), Acute Myeloid Leukemia (AML), Chronic Myelogenous Leukemia

### More Information

**Description:** This is a treatment protocol for an unrelated umbilical cord blood transplant (UCBT) using a myeloablative preparative regimen for the treatment of hematological diseases, including, but not limited to acute leukemias. There is no research element except the collection of routine clinical data.

**Contact(s):** Timothy Krepski - [tkrepsk1@fairview.org](mailto:tkrepsk1@fairview.org)

**Principal Investigator:** Margaret MacMillan, MD

**IRB**

**Number:** 1305M34181

**System ID:** 15529
