

## A Pilot Trial of UrApp, a Novel Mobile Application for Childhood Nephrotic Syndrome Management

**Status:** Recruiting

### Eligibility Criteria

**Age:** 18 years and over

This study is NOT accepting healthy

**Healthy Volunteers:** volunteers

#### Inclusion Criteria:

- caregivers of children ages 1-17 with steroid sensitive nephrotic syndrome within 4 weeks of starting corticosteroid treatment - caregivers of children with steroid sensitive nephrotic syndrome diagnosed within 42 days at the time of starting the study - access to internet or Wi-Fi in the home - caregiver proficient with the English language

---

#### Exclusion Criteria:

- caregivers of children with end-stage kidney disease, renal transplant, or secondary nephrotic syndrome (due to systemic lupus erythematosus)

### Conditions & Interventions

#### Conditions:

Kidney, Prostate & Urinary

#### Keywords:

Idiopathic Nephrotic Syndrome

### More Information

**Description:** We are studying a new phone app, UrApp, for parents (or caregivers) to use when managing the care of children who have been diagnosed with nephrotic syndrome in the last six weeks. We will look at medication and urine monitoring with two groups; one will use the app, the other will have usual care. Study participation will last for one year.
